---

Passdown Summary:

- GST/IMAT expected this afternoon (8 crew/1 boat)
  - ITC will attempt transfer ops from tanks 80-7 to 80-18 around 0700. Fire equi staged around transfer line.
- Currently 159 totes (275 gal ea) and 155 drums of foam on hand.
- Containment wall in tack; more clay in route to pack more
  - Rain is forecasted, no contingency at this time
  - Approximately 8500' boom deployed and 5000' on hand
  - Protection boom placed at: ITC, Tuckers Bayou, Carpenters Bayou, Old River and San Anna Marsh
  - Protection boom needed at: Patrick Bayou and San Jacinto River
  - Cease cargo operations in place from Care Facility to Old River due to benzene levels
  - 0500 10ppm benzene at Care Facility; .5ppm benzene at CEMEX USA. Benzene levels will impact ability for neighboring facilities to conduct cargo ops.
  - 0700 ops brief and 0800 stakeholders call planned
  - Oncoming watch needs to follow up to ensure RP requests Cg overflight this am as per CAPT Odditt request.
  - IAP has not been updated since 21MAR night.
